Chapter 1. Sum Up

Addition of numbers

Addition is the process of combining 2 number in math.

Addition in math is **a process of combining two or more numbers**. Addends are the numbers added, and the result or the final answer we get after the process is called the sum.

How to add numbers

Here you will find instructions to use the addition feature of the JPS calculator.

To successfully add numbers, you must know what is addition.

Use this task to add two numbers using the addition feature of the JPS calculator.

1. Enter the first number.
2. Click the plus (+) button.
3. Enter the second number.
4. Click the equal button.

The result from the subtraction is displayed.

If you want to add 2 to 3, the equation will look like $2+3=5$. The result 5 appears on the screen.

Chapter 2. Subtract

Subtraction of numbers

Explains subtraction as a mathematical operation.

Subtraction is the mathematical operation; it is a process or action that you do with numbers. Subtraction allows you to find the difference of two numbers.

How to subtract numbers

Here you will find instructions to use the subtraction feature of the JPS calculator.

To successfully subtract numbers, you must know what is subtraction.

Use this task to subtract two numbers using the subtraction feature of the JPS calculator.

1. Enter the first number.
2. Click the minus (-) button.
3. Enter the second number.
4. Click the equal button.

The result from the subtraction is displayed.

If you want to subtract 2 from 3, the equation will look like $3-2=1$. The result 1 appears on the display screen.

Chapter 3. Multiply

Multiplication of numbers

Addition is the process of combining 2 number in math.

Multiplication in math is **a process of multiplying two or more numbers**.

How to multiply numbers

To successfully multiply numbers, you must know what is multiplication.

Use this task to multiply two numbers using the multiplication feature of the JPS calculator.

1. Enter the first number.
2. Click the multiplication (x) button.
3. Enter the second number.
4. Click the equal button.

The result from the multiplication is displayed.

If you want to multiply 2 and 3, the equation will look like $3 \times 2 = 6$. The result 6 appears on the display screen.

Chapter 4. Divide

How to divide numbers

To successfully divide two numbers, you must know what is division.

Use this task to divide two numbers using the division feature of the JPS calculator.

1. Enter the first number.
2. Click the division (/) button.
3. Enter the second number.
4. Click the equal button.

The result from the division is displayed.

If you want to divide 4 by 2, the equation will look like $4/2=2$. The result 2 appears on the display screen.
